To Whom It May Concern:

It is without hesitation that I recommend Helios Solar Energy and E2/ECTA for solar installation. Josh and his team listened to my business needs from our initial meeting and designed a system that maximized my solar production potential. The company explained that there are many annual revenue earning potentials which include the sale of New Jersey based energy credits, the electric cost savings of the system from our utility company along with the federal tax incentives, thus providing an impressive rate of return which made the decision to go solar for our organization an easy choice. As the project progressed I felt very confident in the professionalism of the team; the personnel I dealt with were always friendly and courteous. They were proactive in working with the township throughout the project, ensuring a smooth design and construction approval.

Their attention to detail and project execution was superb. I presented them with an extremely tight year-end deadline and they delivered on time. I would absolutely recommend them to any corporation or health care facility considering going solar.

Sincerely,

Steve Izzo, LNHA MPH
